CO2-Balance

X-Plast, founded in 2012, is an expert company in the production of plastic injection molds. As a family company based in Kaçanik, we are one of the leading manufacturers, innovators and technology leaders in the field of solid plastic packaging - and have been pioneers in durable packaging for over 20 years.

We are focused on offering quality to our products to manufacturers in all possible industries, always staying close and dedicated to the work and details in the realization of our products. With future market-oriented innovations, we continue to set standards for the packaging industry. Our extensive product portfolio is the result of decades of close cooperation with our customers.

The platform and philosophy of our work is closely related to the development and application of new and innovative ideas. By believing in new technologies we take our responsibility to nature, always striving to shape and maintain ecological balance
